

Digital High Definition Satellite Receiver

Ariva 100

Ariva 100 is by far the best and cheapest source of digital satellite television channels in both high-resolution HD and standard-resolution SD. The rear panel contains an Ethernet port and a USB port with support for recording and MP3, OGG, JPEG, MPEG, which makes this receiver a true home entertainment center. A characteristic feature is the power efficiency and consumption of standby power exceeding 1W. The card reader hidden under a flap on the front panel allow you to watch any pay television in High Definition. We are confident that Ariva 100 will satisfy even the most demanding users.
